About This Game

Family-friendly PC tower defense game. You'll lead the resistance of plants, which are being captured by aliens from exhausted starving planet.

Place towers and build barricades, freeze, teleport and blow them up - but don't let them enslave You!

- **well thought out balance** - each tower and spell are unique, there is no universal weapon!
- **a new mechanic** - you not only build the towers, but also clear the territory for their construction. And also grow and protect resource-giving plants!
- **various map modifications** that significantly affect the gameplay!
- **random enemy routes at the forks** - the game is never the same experience twice!
- **control over the towers** - you can directly set the target for all towers!
- **20 handcrafted levels** (and we are planning even more!);
- **high replayability** - pass levels, get achievements and perform special missions!
- **bright, juicy graphics**;
- **no cruelty and violence** - play with the whole family!

Stay on Your toes as Your fight with armoured knights and heavy-footed giants, impregnable wizards and skilful Gunners, battle bees and even flying saucers full of aliens!

Hit, burn, freeze and bewitch the invaders with 5 unique towers: Boxer, Mage, Stone-thrower, Chili and Freezer. Buy power-ups in the game shop to specialize Your defenses and fortify even more!

Support Your defenses with four spells that often are real life-savers! Build barricades to block enemies' routes, blow 'em up and teleport! And grow the field of sun-giving plants necessary for Your upgrades!

The game is currently in progress. Now we are working on:

- improving our graphics and visual effects;
- adding more content (upgrades and powerups to bring more strategical variety; new levels, modes and achievements for higher replayability).
